Guide to vocational education and training

Author: Hyland, Terry; Winch, Christopher

Abstract:
This guide to vocational education and training (VET) in England traces the endlessly repeating problems which have, again and again, stunted progression and growth in VET in England over past decades. The authors provide an analysis of the overall situation affecting VET, supplemented by positive suggestions for a more promising future. As VET policy reform in England is now high on the governments agenda, in view of its role in economic competitiveness, the book analyses the complex, problematic 'skills agenda' including new developments in the VET system, comparing this with European...
